Total	5,482.2	5,246.9	A	+4.5%	5,047.2	A	+8.6%

At the end of the first quarter of 2019, the balance of total assets was 5,482.2 million, an increase of 8.6% in 12 months, and 4.5% over the last quarter. The growth recorded in total assets was particularly due to the increased volume of financial investments, 18.5% in 12 months, and 10.1% over the past three months. Banese's policy is to make use of financial resources resulting from the difference between funding volumes and volumes earmarked for loans and other legal allocations, to increase its income.

In the composition of assets, net credit assets accounted for 41.7% of total assets; marketable securities and short-term interbank investments, 42.9%; and restricted credits, permanent assets and other assets, 15.4%. Compared to the previous quarter, financial investments increased their relative share by 2.2 pp.; net credit assets decreased their share by -1.6 pp.; and the sum of restricted credits, permanent assets and other assets decreased their share by -0.6 pp.

The net variation in assets invested in credit was 6.0% in 1Q19 against the same quarter of the previous year, with a portfolio of R\$2.3 billion at the end of the period. The volume of provisioning was reduced due the positive variation in the risk rating of transactions in the portfolio, and the transfer to loss of loan loss transactions.

Restricted credit volumes dropped in the past 12 months due to a change in the rules on compulsory demand deposits, as established by the Central Bank of Brazil, which resulted in the release of approximately R\$80.0 million from compulsory payment bases on December 31, 2018, the proceeds of which were transferred to financial investments.

Funding

Banese's funding structure is quite diversified, which contributes to maintaining comfortable levels of liquidity, as well as supporting the resumption of credit granting in a scenario of economic recovery.

Total	4,815.7	4,635.7	A	+3.9%	4,429.3	A	+8.7%

In March 2019, total funding amounted to R\$4,815.7 million, an increase of 8.7% (R\$ +386.4 million) in 12 months. We highlight the 23.8% growth in judicial deposits (R\$ +215.5 million), as a result of the agreement entered into between Banese and the State of Sergipe Court of Appeals, which granted exclusiveness to the Bank for this type of deposit in the State; 9.4% in savings accounts deposits (R\$ +119.2 million), due to a more conservative profile of Banese's customers and their perceived credibility of the Bank; and 16.3% in demand deposits (R\$ +96.5 million).

Time and interbank deposits varied positively in the quarterly analysis, reflecting new funding from the State Government of Sergipe, individuals and legal entities, which were carried out on an arm's length basis. In the annual analysis, time and interbank deposits declined slightly regarding funding from legal entities, and real estate and rural credit interbank deposits, due to the reciprocity/consideration provided by customers.

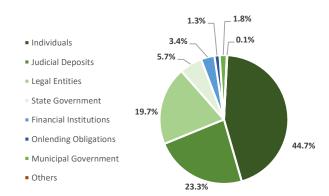

Growth in Time Deposits (CDB / RDB)

The final balances of time deposits increased by 3.7% over the past 12 months, and 12.2% comparing 1Q19 to 4Q18. The result reflects funding from the State Government of Sergipe, individuals and legal entities, as mentioned above, as well as the reclassification of funds from demand deposits, since the returns offered by time deposit instruments, particularly in the fixed income category, provide an adequate profitability alternative and no significant risk in a scenario of falling inflation and interest rates.

Funding from Financial Bills increased by 6.8% in the quarter (R\$ +3.4 million) and 34.1% in 12 months (R\$ +13.7 million), as a result of new funding from legal entities. Subordinated Financial Bills recorded a decrease due to the settlement of securities upon maturity, and payment of interest. In the past 12 months, the volume of Real Estate Credit Bills (LCIs) increased by 9.5% (R\$ + 4.3 million) due to new funding from credit transactions that backed the LCIs, and transactions for individuals, due to the fact that these investments are not subject to income tax, which may increase profitability when compared to other conservative fixed-income products.

Largest Funding Sources (% of total)

The largest source of Banese's funding are individual customers, who account for approximately 45% of the volume raised. Legal entities account for 20% of funding. The proportion of funding between individuals and legal entities, with no concentration in large customers, reduces liquidity risks that could require settlements of large transactions, potentially affecting the Bank's profitability.

Judicial deposits account for approximately 23% of the total funding volume obtained by Banese.

Funding costs had a negative variation in the past 12 months and over the quarter.

From 4Q18 to 1Q19, the decreases observed, both in absolute amounts and in terms of the CDI, considering the stability of the basic interest rate, resulted from an increase in the share of judicial deposits (funding with lower costs) in total funding, and the settlement of a portion of the inventory of Subordinated Financial Bills - LFSs. In the comparison between 1Q19 and 1Q18, in addition to the reasons mentioned above, there was growth in the share of savings deposits (funding with lower costs) in total funding and lower earnings on funding in LFSs due to lower inflation rates.

Banese's credit portfolio reached R\$2.4 billion in assets, or +0.5% against 4Q18 and +5.0% against 1Q18. The scenario described for Banese's credit portfolio is the result of a still limited recovery of the economic environment; adjustment of the population to its indebtedness; and active companies that are refraining to make new investments to expand/modernize their business.

In the commercial segment, Banese has a prominent position in its market. According to the Central Bank of Brazil, Banese holds 41.0% (base: February 2019) of the commercial loan market in the State of Sergipe. The exposure is spread over a large number of small and midsize customers and transactions, mitigating individual credit risks and avoiding the negative impact that would otherwise be generated by the potential default of a major operation.

The commercial loan portfolio increased by 7.1% in 12 months, and by 1.5% against the previous quarter. The credit market continues to expand, with a focus on increasing loan transactions in the segment of free funds particularly intended for personal credit. The positive trend in the behavior of credit balances contributed to support the increase in family consumption, as well as the recovery of business activities in 2018 and at the beginning of this year.

The positive figures reported were due to the planned actions taken by the business areas before accredited companies, and state and municipal government bodies, as well as to the strategies used by the Bank's business units to reach a large scale of customers that are eligible to credit, including through initiatives involving credit portability.

The commercial loan portfolio for individuals increased by 9.8% compared to 1Q18. In this period, the commercial loan portfolio for legal entities decreased by 3.6%, also due to the impact of the macroeconomic conditions recorded in the period, and subject to the conservative credit granting policies of Banese.

The development loan portfolio, which includes the real estate, industrial and agribusiness portfolios, accounted for 21.9% of the Bank's total loan portfolio. Still influenced by the economic outlook of the State of Sergipe, the development portfolio recorded a retraction in the past 12 months (-2.6%), and a slight reduction compared to the previous quarter (-0.2%). This result reflects the downturn recorded in the State's real estate sector in recent years.

It is important to stress that the real estate portfolio, which is responsible for a major portion of the development loans granted, is extremely sensitive to a low activity economic environment and lack of confidence because they are high individual transactions with long settlement terms.

In relative terms, the loan segments classified between "AA" and "C" risk ratings account for 94.6% of Banese's total portfolio (compared to 92.9% in 1Q18). Loans classified at risk ratings "D" through "H", which concentrate higher-risk transactions, accounted for 5.4% of Banese's credit portfolio (or -1.7 pp., compared to 7.1% 1Q18).

In terms of significance on total credit by segment, products with lower credit quality are those included in the industrial (where loans classified as "D - H" account for 43.5% of the portfolio) and rural (24.5% of the portfolio with "D-H" risk levels) portfolios. The rating refers to the characteristics of the products and the relatively high volume of each individual operation.

In the past 12 months, considering the drop in the economy's basic interest rate, and our goal to increase the profitability of treasury assets, the funds invested in short-term interbank repurchase transactions migrated to fund shares and to assets relating to the fulfilment of obligations with the Central Bank (Real Estate DIs).

There was a reduction in compulsory deposits, in assets linked to rural credit (Rural DI) and LCI, as a result of changes in regulations that restrict the calculation of LCI for purposes of compliance with savings deposits requirements as from January 1, 2019, and the effect of changes in rural credit requirements for the new 2018-2019 crop year. It is important to stress that the compulsory deposits are remunerated and despite recording lower spreads than those of real estate loans are totally risk-free.

Banese is subject to the rules of Circular No. 3.068 of the Central Bank, which sets out criteria for accounting registration and valuation of marketable securities. This means that investments are made in liquidity instruments denominated in national currency and are constantly marked to market to mitigate risks related to changes in the value and volatility of financial instruments.

Portfolio Profitability

The strategy of the treasury assets portfolio is to maintain allocations in net and low-risk assets, so as to keep comfortable liquidity and capital levels, while its profitability target is to track the country's interest rates.

The portfolio's accumulated profitability in 1Q19 corresponded to 101.19% of the CDI, higher than 100.34% of the CDI in the end of 2018 (+0.85 pp.) and 100.58% of the CDI in 1Q18 (+0.61 pp.). The profitability shown was impacted by the performance of investment funds and marking-to-market of public securities, within a scenario of higher volatility of Brazilian assets.

ANALYSIS OF RESULTS

Revenues

Breakdown of Revenues - R\$ million

	215.0	219.3	_	-2.0%	207.0	A	+3.9%

Banese's revenues totaled R\$215.0 million in the first quarter of 2019, representing a growth of 3.9% against the same period of the previous year.

This variation is due to the 22.6% increase in revenues from financial investments, as a result of the increased volume of financial investments in the period and stability of the basic interest rate in Brazil; and the growth in credit revenues, due to the positive variation in the portfolio, despite the repricing of these assets. The slight growth in revenues from the provision of services, and the drop in other operating revenues, particularly in revenues from the recovery of loans written-off against losses, reduced the overall result of total revenues.

In the comparison between 1Q19 and 4Q18, total revenues decreased by 2.0%. The main negative variations were recorded in the group of Other Operating Revenues, as explained above, due to lower revenues from the recovery of loans written-off against losses in the quarter, and the reduction in revenues from the provision of services, considering that, in the last quarter of 2018, seasonal revenues were recorded in relation to an annual production bonus of Grupo Segurador Mapfre.

The growth seen in income from equity interests was due to the equity income in SEAC – Sergipe Administradora de Cartões Ltda., after a capital contribution and increase in equity interest in said company.

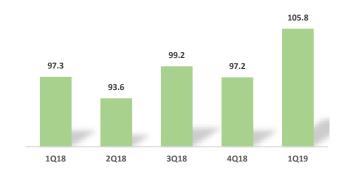

Costs and Expenses

Direct Operating Costs - R\$ million

	1Q19	4Q18		V3M	1Q18		V12M
Funding expenses	52.6	51.7		+1.7%	51.4		+2.3%

Total	55.8	52.8	A	+5.7%	52.7	A	+5.9%

Funding expenses increased by 2.3% in the year, and 1.7% against the previous quarter, due to the growth in funding volumes, although these effects were offset by the redemption on the maturity date of Subordinated Financial Bills in January 2018, which had higher funding costs.

Net Interest Income (NII) - R\$ million

Net Interest Income (Income from Loans plus Income from Financial Investments less Direct Funding Costs) increased by 8.7% in the comparison between 1Q19 and 1Q18.

In the analysis of 1Q19 against 4Q18, the change was +8.8%.

The result is a combination of factors presented in items previously mentioned in this report.

Personnel expenses/Payroll - R\$ million

	1Q19	4Q18		V3M	1Q18		V12M
Salaries	25.3	26.4	_	-4.2%	24.2	A	+4.5%

Training programs and other	0.2	0.5	_	-60.0%	0.2	•	ND
Total	42.4	44.9	_	-5.6%	41.3	A	+2.7%

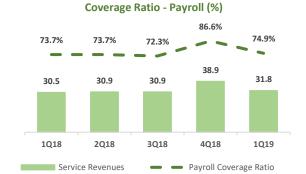

Personnel expenses increased by 2.7% against 1Q18 and decreased by 5.6% compared to 4T18. The increase in expenses in 12 months is in line with inflation and salary adjustment for bank employees in the period, and does not represent real growth. The reduction against 4Q18 takes into account specific expenses recorded in December such as: 13th salary, and 13th-grocery basket (collective bargaining agreement).

Banese's management intends to fund the largest possible portion of its personal and administrative expenses with funds from revenue from services.

The payroll coverage ratio was 74.9% in 1Q19, with a positive variation of 1.2 pp against 1Q18, and -11.7 pp against 4Q18.

The negative variation in the last quarter was caused by extraordinary revenues in 4Q18, as already mentioned in this report.

Other administrative expenses increased by 22.7% (R\$ +7.4 million) in 12 months. The increase in expenses from Third-party Services has influenced the increase in administrative expenses, particularly those regarding expansion of the network of Correspondents in Brazil, and the "Saque e Pague" Electronic Services Outlets (or "PAE" Network). These expenses relate to strategic processes to migrate services from Banese to several service outlets other than the branches, in addition to the expenses with specialized technical services and data systems and processing, which are also directly related to the strategic processes for migration of services to digital channels. In the last quarter, there was a small variation in other administrative expenses compared to 4Q18 (+1.0%).

Expenses from Allowance for Loan Losses (PCLD) amounted to R\$20.1 million in 1Q19, R\$-6.1 million against 1Q18 and R\$+2.6 million above the volume recorded in 4Q18.

The reduction in default rates, the positive variation in the risk rating of portfolio transactions, and the transfer to losses of unrecoverable loan loss transactions resulted in the recording of lower amounts for these expenses.

The decrease in other operating expenses resulted from the new procedures for recording remuneration of capital, as set forth in CMN Resolution 4706/2018 and Bacen Circular Letter 3935/2019. Expenses from interest on equity were excluded from Cosif, which justifies the reduction recorded in the period in question.

Net Income - R\$ millions

Net income

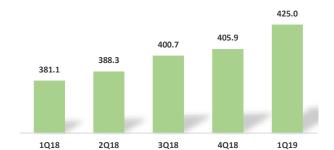

As a result of the behavior of business previously presented, the expansion in the loan portfolio and the growth in funding and net interest income, net income of Banese in 1Q19 amounted to R\$19.0 million, an increase of 3.8% compared to income recorded in the same period of the previous year, and 33.8% above the figure recorded in 4Q18.

Shareholders' Equity

Banese's shareholders' equity fluctuated 11.5% in 12 months and 4.7% compared to 4Q18, primarily due to the incorporation of income for the period to the profit reserve.

Shareholders' Equity recorded in the end of 1Q19 does not include the provision for distribution of Interest on Equity to be carried out until the end of the year.

The Basel Ratio for the Conglomerate was 14.0% in the end of 1Q19, while the extended ratio was 12.7%, representing a decrease of 0.2 pp. in both ratios when compared to those recorded in the end of 4Q18, due to the 6.26% increase (approx. R\$196.9 million) in Risk-weighted Assets (RWA), as a result of the 4.3% growth (approx. R\$114.7 million) in Credit Risk-weighted Assets, and of 39.5% (approx. R\$48 million) in Market Risk-weighted Assets. Compared to 1Q19 and 1Q18, the Basel ratio decreased 0.5 pp., and the extended Basel ratio decreased 0.8 pp., as a result of the 13.6% increase in Risk-weighted Assets (RWA) (approx. R\$400.5 million), due to the 9.8% growth (approx. R\$245.3 million) in Credit Risk-weighted Assets, and of 209% (approx. R\$114.6 million) in Market Risk-weighted Assets.

The fixed asset-to-equity ratio ended 1Q19 at 18.17%, a 0.12 pp. increase compared to 4Q18, given the 3.96% increase (approx. R\$3.8 million) in permanent assets. Compared to 1Q18, there was a 0.18 pp. increase against 1Q19, due to the 5.53% growth (approx. R\$5.3 million) in permanent assets.

The result was substantially below the minimum fixed assets requirements of 50% set by the Central Bank of Brazil. It is important to stress that the lower this ratio, the better.

Ratings

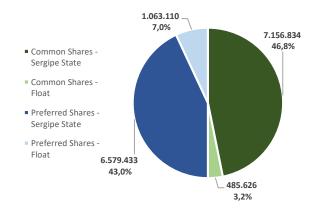

On August 14, 2018, Fitch Ratings increased Banese's National Long-Term Rating to "A-(bra)" ("A" less (bra)) from "BBB+(bra)" ("BBB" plus (bra)), and its National Short-Term Rating to "F1" (bra), from "F2(bra)", maintaining the long-term rating outlook as "Stable." The increase in Banese's national ratings reflected Fitch's opinion about the strengthening of the Bank's financial profile. It also highlighted a consistent recovery in profits with maintenance of high levels since 2016, the sustainable growth in controlled loans, and stable default rates, even under a challenging operating environment.

On October 16, 2018, Moody's Investors Service reaffirmed Banese's "ba2" individual credit risk rating, as well as its "Aa3.br" deposit rating, long-term, and BR-1, short-term, on the Brazilian national scale, and maintained a Stable Outlook. The maintenance of the rating took into account Banese's market share in the State of Sergipe (approximately one third of deposits and loans), and the Bank's focus on providing financial services to state public servants, as well as to small and midsize companies, which are strongly connected to the economy of the State.

Financial Services - Banese 2.0

The Remote Capture Checks (RDC) service simplifies the check deposit process for Legal Entities. The volume of transactions was 14.0 thousand in 1Q19, with a volume of R\$24.2 million.

The Intelligent Deposit service enables Legal Entities to speed up the online conversion of cash flows into working capital, besides mitigating risks of fraud. Total amount of transactions was R\$107.8 million in 1Q19, an increase of 8.2% compared to 1Q18.

Banese also makes available 78 ATMs for the recycling of bills throughout the State, in addition to 90 ATM in partnership with the "Saque e Pague" network.

Investment in Human Capital

The Bank invested in educational programs, based on the strategic plan of the institution, with the purpose of developing skills and increasing the performance and engagement of its teams.

The Vocational Training Incentive Program is among the main actions held by Banese. It gives the employees the opportunity to attend undergraduate, specialization and foreign language courses by offering a 50% refund of the total tuition of the course. The Bank also offers programs for obtainment of mandatory certifications, in addition to participation in events and training programs.

The Banese Corporate University, a virtual learning environment that makes available more than 100 self-educational courses to the employees, recorded 82 courses completed in 1Q19, with a focus on: Credit Collection and Recovery, Updating of Operating Records, Investor Profile Analysis, Banese's Code of Ethical Conduct, and Introduction to the Cards Market. The courses were developed by persons in charge of the organization's contents.

THE BANESE CONGLOMERATE

The Banese economic conglomerate includes the company "Sergipe Administradora de Cartões e Serviços Ltda. (SEAC)." The group also includes the companies "Banese Corretora e Administradora de Seguros," "Instituto Banese de Seguridade Social" (SERGUS), "Caixa de Assistência dos Empregados do Banese (CASSE)" and the Banese Institute. The latter is intended for managing social and environmental responsibilities, and supporting cultural manifestations.

Sergipe Administradora de Cartões e Serviços Ltda.

Sergipe Administradora de Cartões e Serviços Ltda. (SEAC) provides services relating to credit and debit cards and other payment means. The Banese Card is present in the States of Sergipe, Alagoas and Paraíba, and is being expanded to the States of Ceará and Rio Grande do Norte.

This fact boosted the growth of 5.39% in the number of customers eligible for purchase compared to 1Q18, totaling 570.9 thousand customers in 1Q19. The financial volume of transactions through the Banese Card credit card (the company's main product) amounted to R\$395.6 million in 1Q19, a growth of 17.7% against 1Q18.

In 1Q19, the Banese Card ELO Virtual Card was launched both in the Portal and in the app, in order to stimulate and boost the purchase power of customers in domestic e-commerce business accepting ELO cards. This fact shows the evolution in the performance of SEAC products, reinforcing competitiveness and the search for excellence. Due to portfolio expansion, SEAC is now able to provide better services regarding the expectations and needs of customers.

Banese Corretora de Seguros

Banese Administradora e Corretora de Seguros Ltda. works in partnership with major market insurers in order to provide the best insurance solutions to its customers.

In 1Q19, the volume of insurance policies contracted amounted to R\$26.4 million, an increase of 32.0% compared to the same quarter in 2018. This result was mainly boosted by the growth in sales of the credit insurance segment and of the following products: "troco premiado" promotion, Lyscar and Banese pools, and Icatu social security and capitalization.

Operating revenues amounted to R\$6.1 million in 1Q19, or an increase of 6.4% compared to the first quarter of the previous year.

Banese Institute and Museu da Gente Sergipana [Museum of the People of Sergipe]

The Banese Institute is an agent of transformation through actions and investments aimed at the interests of the community, and the promotion of scientific, technological, economic, artistic, social and environmental, and cultural development in the State.

The actions and projects sponsored by the Banese Institute in 1Q19 received total investments of R\$66.5 thousand, and involved more than 9,985 persons.

The "Museu da Gente Sergipana Governador Marcelo Déda" reinforces the role of Banese as a major supporter and sponsor of the several languages of the culture of Sergipe, including its folkloric manifestations, symbols, nature, art, history, food, festivals and costumes.

The museum was visited by 27,236 persons in 1Q19.
